

PUBLIC SPEAKING PRESENTATION

Pick a topic from the list below:

1. Products that are important to the health and comfort of people that are obtained from the forest.
2. How forest products contribute the nation's economy.
3. The types of plants that make up the various strata of our school's forest.
4. The life forms that contribute to the biological value of our school's forest.
5. The naturally occurring forest functions that contribute to the biological value of our school's forest.
6. How a watershed functions, and explain why a forested watershed is superior to a watershed that lacks forest plant cover.
7. A healthy forest environment contributes to stable populations of wild animals.
8. Renewable and non-renewable resources.
9. The major uses of forest products in the United States.
10. How wood and other biomass materials are converted into energy sources.
11. Explain the multiple-use concept of management for lands owned by the public.

Develop a 6-8-minute speech based on a topic above.

Obtain a Public Speaking Rubric from your instructor.

Begin developing your speech and visual aids for the presentation.

Schedule a time to give your speech to your class and another class at school.
